

Ginger Rhizome Production Field Day

At Useful Yard Company and Epiphany Farms Estate

Growing fresh ginger is challenging in the Midwest, but this premium crop can command high prices. Illinois Extension's Ginger Growers Group—a collaborative group of small farmers and Extension educators—is working hard to develop a set of best practices of ginger production in Illinois, so that this could become a more viable and better-understood option for Illinois specialty crop farmers.

Join us for a two-stop ginger tour evening and see fresh ginger rhizomes growing in field conditions, in a high tunnel, in soilless media grow bags, in cold frames, and in a greenhouse!

**September 23
5:30-7:30 p.m.**

Learn the ins and outs of fresh ginger production

- Stop 1: Useful Yard Company
- Stop 2: Epiphany Farms Estate
